WAKOL MS 260 Wood Flooring Adhesive, firm-flexible – tenacious holding strength

Flexible enough to allow natural movement and avoid substrate damage

WAKOL MS 260 Wood Flooring Adhesive, firm-flexible is the newest generation of MS polymer wood flooring adhesives. The adhesive combines a strong bond with the flexibility to allow the wood floors natural movement. It absorbs swell shear forces and develops a very high internal tensile strength.

These two factors give WAKOL MS 260 Wood Flooring Adhesive, firm-flexible the ability to maintain a firm bond to the subfloor while its internal strength allows natural movement and avoids damage of the substrate.

Elastic bonding without block tearing

The new MS wood flooring adhesive WAKOL MS 260 Wood Flooring Adhesive, firm-flexible combines elasticity and strength. The adhesive absorbs swell shear forces and compared with conventional elastic adhesives achieves a very high internal strength. In other words: elastic but strong!

Block tearing is above all related to the strength of the adhesive, and the greater the internal strength, the lower the risk of block tearing. WAKOL MS 260 Wood Flooring Adhesive, firm-flexible, keeps that risk as low as with shear-resistant 2K PU adhesives.

No interactions with paint systems

Undesired interactions between MS adhesives and paints depend on the type and quantity of the contained plasticisers. WAKOL MS 260 Wood Flooring Adhesive, firm-flexible, is optimised in this regard, and is generally uncritical for paints. In combination with Loba paints, the "Connected Systems" system guarantee makes the adhesive a worry-free package!

CONNECTED SYSTEMS – the worry-free package

WAKOL MS 260 Wood Flooring Adhesive, firm-flexible, is part of the new system guarantee from Loba and Wakol. That is: WAKOL MS 260 Wood Flooring Adhesive, firm-flexible, and the recommended Loba paints

are keyed to one another. Insurance protection exists across systems for the joint use of the systems, so that worries about undesired interactions become a thing of the past – rest assured!

Benefits of WAKOL MS 260 Wood Flooring Adhesive, firm-flexible

- For use on all species of wood flooring
- Suitable for solid or engineered floors
- Use with WAKOL PU 280 Moisture Barrier as needed
- Can be used on wood or concrete
- Very easy to trowel
- Excellent coverage rate
- Fast drying, sand in 24 hours
- Maximum emptying thanks to special sealing
- Easy clean-up
- Connected System for unfinished floors
- Especially long storage stability: 18 months
- Best emissions class EMICODE EC1 PLUS

Please always observe the product data sheet before processing.
